When somebody saddles the county with a suit for damages the authorities will probably come to the conclusion that the rickety old steps which disgrace the Court House fence should have been repaired. Since the above was put in type we learn that Jailer Berry scraped acquaintance with the stifle fronting Burchett's store.

A pumpkin was grown on Captain Freese's place this fall which weighs sixty-six pounds. The seed was found under the old eye-moore above town, the one on which the Father of his Country cut his initials, and the pumpkin was severed from the vine with the hatchet George used on the cherry tree. It-the pumpkin, not the hatchet—can be seen at C. D. Norris and Co's grocery.

Last week a shooting scrape occurred on Elk Creek, in Martin co. in which Shade Chapman killed his uncle, David James. The killing was the result of a difficulty several days before in which Chapman beat James very badly with an auger. It is said that Chapman way-laid James' house until he came out. James had a rifle and as he came out he received a load of slugs from a shot gun in the hands of Chapman; and as this did not seem to prove fatal Chapman fired five shots from a pistol, all of which took effect.

Louisa and vicinity have a genuine sensation at last. It isn't a snake, a scandal or a murder—it's a Wild man. We have not seen him, but that doesn't matter, he has been seen and heard by others. He roams around the Lick Creek region and has scared the inhabitants out of their wits. He has long yellow hair and whiskers, and the amount of clothing he wears would not stock a first class clothing store. Seriously, an odd looking something, entirely naked, has been seen several times in the neighborhood mentioned, and the people are considerably puzzled over it.

REPORTS OF GOVERNMENT CHEMISTS

As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances. E. G. LOVE, Ph.D."

"It is a scientific fact that the Royal Baking Powder is absolutely pure. H. A. MOTT, Ph.D."

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious substance. Henry Morton, Ph.D., President of Stevens Institute of Technology."

"I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. DANA HAYES, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1874; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country. No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world.

NOTE.—The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schodler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schodler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any fair-minded person of these facts.

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.

Positions when Competent.

I entered the Louisville Shorthand Institute in September, 1884, having no knowledge of the subject whatsoever. I graduated in February, 1885, and immediately obtained a position with Messrs. Ray & Co., of this city, through the Principal of the Institute. I wish to add that Prof. Hale fulfilled every promise made to me before entering the school. A. VARILLA
